Fund Manager's Commentary

After taking a breather in November, the UAE equity markets recorded a strong performance during the month of December with Dubai Financial Market and Abu Dhabi Securities Market increased by 13.88% and 12.92% respectively.

The rally was across the board; however this month's gainers list was dominated by real estate companies in both DFM and ADSM. Emaar properties the heavy weight stock in the DFM Index gained 27.50% underpinned by news regarding shares buyback meanwhile Aldar Properties in ADSM added 31% to its value during the period.

The sentiments was very positive during the month as both retail investors and local institutions accumulated their positions towards the year end in the anticipation of strong corporate earnings in the fourth quarter and expected strong funds influx from western investors towards the beginning of 2008.

Your fund gained 15.34% outperforming the benchmark by 1.38% thanks to our overweight in Emaar, Etisalat, ARTC and ENBD which all have outperformed the benchmark during the month. The fund ended the year 2007 with a positive return of 51.9% generating alpha for its investors of 7.30% thanks to a resilient investment strategy and the clarity of investment discipline.

We expect 2008 to be another good year for the UAE equity markets through a further influx of Western institutional investors, improving transparency and corporate governance, reasonable valuation multiples when compared to emerging markets, double digit earnings growth which are well above emerging markets and global levels, and strong economic growth underpinned by increasing oil prices.
