Dubai Financial Market PJSC	6.5%

Fund Manager's Commentary

UAE Equity markets were weak in the month of March in terms of performance and activity. Trading value in both Abu Dhabi Securities Market and Dubai Financial Market has declined sharply by 35% and 45% respectively as investors seemed to be cautious waiting the first quarter results. Profit booking seemed to be one of the major reasons for this month's decline as both markets raked up major gains last month. The selling of was across the board and resulted in sharp losses in DFM of 10.2% compared to 5.4% in ADASM.

In the DFM market Losses in heavyweight stocks like Emaar, DIB, and ENBD which lost 12%, 13.3% and 7.9% respectively dragged the DFM index down very sharply. On the other hand the most liquid stocks like Air Arabia, and DFM psjc ended the month in a negative territory and significantly went down by 13.5% and 18.7% respectively.

In Abu Dhabi market energy stocks were the worst performers as both Aabar and Taqa lost 31.2% and 15.5% meanwhile Abu Dhabi banks except for FGB stood solid on the face of the profit taking wave and showed strong relative performance to index.

Your fund lost 9% compared to losses of MSCI UAE index of 8.7%, where the slight underperformance came from our overweight Emaar, Etisalat and DFM psjc.

The negative price action in March has taken the UAE equity markets to attractive valuation multiples territory which we believe will combined with strong first quarter results to the lift the markets up in the short term. In the medium to long run UAE economy is expected to exhibit resilience in the face of slowdown in advanced world and is expected to continue witnessing the recent trend of high economic growth.
